DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statements (IDS) submitted on 12/24/03 and 3/25/05 have been considered by the examiner.

Specification

2. The disclosure is objected to because of the following informalities: the related application section should be amended to indicate that 09/862,022 is now U.S. Patent 6,630,047.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is indefinite because it is directed to a method of bonding a fluoropolymer to a substrate but there is no claimed step of bonding and the body of the claim does not mention a substrate. It appears that the "second component" is the substrate and that the exposing step bonds the fluoropolymer in the mixture to the substrate. It is suggested to amend the claim to more clearly and concisely reflect the claimed subject matter.

It is suggested to change "second component" to - - substrate - -.

Art Unit: 1733

It is also suggested to amend the end of the exposing step to state - - thereby bonding the fluoropolymer to the substrate - -.

Double Patenting

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claims 1-13 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-29 of U.S. Patent No. 6,630,047. Although the conflicting claims are not identical, they are not patentably distinct from each other because claim 19 of the patent encompasses claim 1 of the application and claim 2 of the patent indicates that light absorbing compounds listed are the preferred light absorbing compounds and claim 9 of the patent indicates that amine is the preferred electron donor. It would have been obvious to one of ordinary skill in the art at the time the invention was made to utilize the preferred light absorbing compounds and preferred electron donor in the method of the patent.
